Uplift and to make PIFFA a positive instrument, we all should join hands: Faiz Mohiuddin

Uplift and to make PIFFA a positive instrument we all (related) should join hands and unite work.

PIFFA is a new born child minor error do occur they may not be made a prestige point but be forgotten said Mr. Faiz Mohiuddin talking with the Commerce Times.

Mr. Faiz Mohiuddin said that in the absence of PIFFA members are suffering and all the programs of the association have reached a stand still position.

We had plan a training program in Lahore and Sialkot, which could not be executed, we also could not provide suggestions to the government. Because government has asked suggestions from us for the finance bill. because of non availability of the body suggestion was not sent.

Several meetings held throughout the globe regarding current financial crises but PIFFA could not arrange a single meeting in this regard despite that the whole industry will suffer from financial crises.

I request Mr. Nadeem Khan, Mr. Asim Saeed and all other friends that they should come sit with us and discuss all the matter to find the way out and save the association from all losses. We are in the initial stages

and changes are occurring with the passage of time we shall step forward keeping aside other personnel interest for the interests of the others.

Pertaining to the question regarding the elections he said about 2-3 months are left for the annual elections hence electioning right now and then after 3 months again, everybody will make a fun and laugh at us thus the elections be held after 3 months and the new elected body be allowed to serve the full tenure so that they can serve peacefully and be accepted. He said not abiding the by laws for which PIFFA is banned, more than 75% of the associations in the country are not abiding the by laws.

Talking about the freight forwarding industry he said it has been awarded an official status but not the facilities that it should have been given. The government should immediately give attention to it as the industry can serve the country in its betterment and development. Government must permit transshipment and also make running finance available it be taken like other industries of the country apart from it we should be allowed to build warehouses for which government should provide land so that we can do our work in a better way and change Pakistan equal to Asian tiger countries.

Interview of Faiz Mohiuddin *continued from page # 1*

To a question regarding Gwadar port. He said that the port is capable for handling national cargo but if allowed for transit shipment we will make Gwadar port like a jewel and run it in a sophisticated manner this will not only accumulate foreign exchange but also make 10 - 15 thousand jobs which will not only alleviate poverty but simultaneously enhance the national GDP and growth of our country. Giving details about his company he said that the company was established in 1994.

There are now seven branches of this company cross the country and world. He said that recently a branch of the company has been established in London also. He said that his company has also been received several awards of appreciations. of Daily Commerce Times Karachi, which has given importance to the issues of freight forward sector. Because this sector has its own importance.
